

ADRIANO FRANCISCO ALVES

Senior Project Controls Systems Specialist | Claims & Subcontracts | BI

Panama City – Panama | WhatsApp: +507-6811-8637 | Email: alvesadr@gmail.com |

LinkedIn: [linkedin.com/in/adriano-alves-10446763](https://www.linkedin.com/in/adriano-alves-10446763) |

Nationality: Brazilian (Italian citizenship)

PROFESSIONAL SUMMARY

Senior professional with more than 25 years of experience supporting infrastructure projects across LATAM through project controls systems, cost and productivity analysis, subcontract administration, claims documentation, and construction payroll controls. Extensive experience in large-scale engineering environments, including the Panama Canal expansion (GUPC), integrating contractual, financial, technical, and operational data to improve traceability, reporting, and decision-making.

Expertise in:

- Direct and indirect cost analysis, S-curves, forecasts, budgets, and variance tracking
- Claims support: data consolidation, chronology, evidence traceability, and technical documentation for negotiations
- Subcontract controls: progress, quantities, costs, payments, change records, and supporting documentation
- Integration of production, costs, subcontractors, construction payroll, HR, inventory, equipment, and schedule-related data
- Executive reporting, KPIs, dashboards, and structured information for project and contract management

LANGUAGES

Portuguese (Native) | Spanish (Fluent) | English (Advanced) | Italian (Intermediate)

CORPORATE RECOGNITIONS

- Corporate recognition for cost savings through the implementation of the SisGep system (Construction).
- Innovation Award for technical participation in the QIMS system (Quality and Safety, corporate rollout).
- Corporate recognitions for the implementation and standardization of cost and subcontract systems in large-scale infrastructure projects.

PROFESSIONAL EXPERIENCE

ADATTA TECNOLOGÍA | PANAMA / LATAM

Senior Systems Specialist and DBA (Project Controls & Cost Analytics) | 2013 - Present

- Design and implementation of corporate systems for construction: cost control, technical payroll, HR, subcontract management, equipment, production, safety, laboratory systems, and BI.
 - Integration of project controls data across costs, production, subcontractors, workforce, and operational systems, supporting traceability and management reporting.
 - IT-Construction integration with industrial devices: biometric turnstiles, CCTV, GPS, truck scales, concrete batching plants, sensors, and RFID.
 - Multinational technical coordination, process standardization, and financial and management reporting to support project decision-making.
-

GUPC – PANAMA CANAL (CONSULTANCY) | PANAMA

Senior Consultant – BI, Subcontracts, Costs and Production | 2013 – 2018

- Implementation of strategic systems and analytical support for production tracking, subcontract administration, cost control, and project reporting.
 - Consolidation and traceability of technical, commercial, and operational information to support claims preparation and negotiations.
-

GUPC – TRACKING SYSTEM (EXPATRIATE) | PANAMA

Technical Coordinator – Sensors, Production and Equipment | 2009 – 2012

- Development of an integrated system for machinery, plants, laboratory and production traceability.
 - IT-Construction integration with central ERP systems and BI platforms.
-

OIV – TOCOMA HYDROELECTRIC PROJECT (EXPATRIATE) | VENEZUELA

IT Specialist – Construction Project | 2008 – 2009

- Implementation of systems for workforce control, weekly field payroll, cost control, budgeting, subcontract management and production tracking.
-

IT CONSULTANT FOR CONSTRUCTION | PANAMA / BRAZIL

Senior Consultant | 2012 – 2013

- System implementations for construction companies, public entities and industrial organizations covering HR, technical payroll, cost control, subcontract management, production systems and BI.

PREVIOUS EXPERIENCE IN BRAZIL

Odeon • Nexo • UNIVAG • Fitpel | 1997 – 2008

- Development of corporate and commercial systems, SQL Server databases, automation of administrative and technical processes, HR, subcontract management and cost control.
-

TECHNOLOGIES, LANGUAGES AND TOOLS

Programming & Development: Delphi, C#, Java, Python, REST, HTML, and Android Studio.

Databases & Data Engineering: SQL Server (performance tuning, security, replication, and auditing), Oracle, MySQL, MongoDB, SSIS, ETL, data modeling, and multi-source data integration.

Project Controls, Claims & Subcontracts: Cost and productivity analytics, budget and variance tracking, claims data organization, evidence traceability, subcontract progress and payment controls, and executive dashboards.

BI & Reporting: SSRS and BI solutions applied to costs, budgets, production, payroll, subcontracts, claims support, KPIs, and management reporting.

BIM & Digital Construction: BIM-oriented data integration linking model and field information with cost, production, subcontract, and asset data; support for traceable project controls and coordinated decision-making.

Industry 4.0 & Systems Integration: IT-Construction integration with biometric systems, turnstiles, CCTV, GPS, truck scales, concrete batching plants, industrial sensors, and RFID for automated data capture and operational traceability.

Applied Analytics & AI: Practical use of Python, machine-learning concepts, and AI-assisted workflows for data analysis, automation, document and information organization, anomaly detection, productivity improvement, and decision support.

EDUCATION

Bachelor's Degree in Systems Administration

Universidad del Istmo (UDI), Panama

The degree included postgraduate-level coursework in Financial Management, Marketing Management, Innovation and Entrepreneurship, completed in lieu of a thesis.

Civil Engineering Coursework

UFMT – Federal University of Mato Grosso, Cuiabá-MT, Brazil

Studies complemented by extensive practical experience in large-scale infrastructure projects, including cost control, workforce management, production monitoring, and subcontract administration.

Systems Development Technology Coursework

UNIVAG – University Center, Várzea Grande-MT, Brazil

Studies applied throughout a long career in systems development, database administration, process automation, and construction management solutions.
