Who we are

Introduction

Adatta Tecnología has operated in **Panama since 2013**, specializing in software development, consulting, databases, and information integration for operational, managerial, and administrative controls.

Its portfolio is built on Adriano Alves's career and **more than 25 years of work** alongside construction and infrastructure teams in Latin America, turning real jobsite needs into practical, traceable solutions.

Delivery profile

- ✓ More than 25 years integrating software, databases, and construction processes in Latin America.
- ✓ Design, implementation, and support of solutions for costs, payroll, human resources, subcontracts, equipment, production, quality, inventories, and BI.
- ✓ Experience in large-scale projects, including the Panama Canal Expansion, metro lines, highways, airports, ports, and hydroelectric projects.
- ✓ Ability to translate engineering, administrative, and contract needs into traceable operational solutions.

*Experience
that delivers
results*

What this appendix demonstrates

	Dimension	Evidence presented
	Clients and projects	Selection of organizations and projects served in Panama and other countries.
	Delivered products	Relationship between client, project, and solution, based on confirmed records of sold proposals.
	Available portfolio	Business products currently presented by Adatta Tecnología.
	Services	Development, integration, consulting, customization, training, and after-sales support.

Solutions born on
the jobsite, for a more
efficient future.

Track Record and Evolution

More than 25 years developing solutions from the reality of major infrastructure projects

Available Products

Modular solutions that can be implemented individually or integrated into a control platform for comprehensive construction projects management.

 PayRoll	 SisGep	 ACM	 Daily Reports	 Tracking	 Contract
 Cost	 Budget	 Tools	 INSP	 LAB	 Doctor

Product	Area	Primary application
Adatta PayRoll	Payroll and Human Resources	Payroll processing, concepts and incidents, overtime hours, vacations, absences, liquidations, social charges, bank payments and HR management.
Adatta SisGep	On-site Workforce Management	Field labor control: assignment to cost centers, shifts, attendance, worked hours, personnel movements and training.
Adatta ACM	Machinery and Equipment	Operational equipment control: worked and downtime hours, assignment to cost centers, hour meters, fuel, lubricants, maintenance and productivity.
Adatta Daily Reports	Production and Construction Progress	Daily recording of activities, production, resources and progress, with photos, incidents, attachments and consolidation of daily reports.
Adatta Tracking	Industrial Tracking and Production	Automatic capture and real-time monitoring of production, integrating plants, scales, sensors and other field systems for traceability and control.
Adatta Contract	Subcontracts and Contracts	Management and control of subcontracts: scope, work orders, measurements, progress, valuations, payments, changes, additions and contractual follow-up.
Adatta Cost	Construction Cost Control	Integration of actual costs, labor, equipment, materials and subcontracts; allocation by cost center, unit costs, budget vs. actual analysis and forecasts.
Adatta Budget	Budgeting and Cost Planning	Preparation and control of construction budgets: unit price analysis, resources, productivity, chapters, quantities and cost structure.
Adatta Tools	Warehouses, Materials, and Tools	Inventory and tools management: receipts, issues, transfers, deliveries, returns, stock levels, custodians and traceability.
Adatta INSP	Quality and Construction Inspections	Field quality inspections management: checklists, findings, non-conformities, photographic evidence, follow-up and closure.
Adatta LAB	Laboratory and Quality Control	Management of construction tests and samples: concrete, cement, aggregates, soils and other materials; results, traceability and control of voids.
Adatta Doctor	Occupational Health and Medicine	Occupational health management: medical histories, consultations, appointments, care, aptitude assessments, medical follow-up and case control.

Technical integrations

SQL Server, Oracle, MySQL, MongoDB, SSIS and ETL; integration with ERP and BI; reading and integration with biometric devices, turnstiles, CCTV, GPS, truck scales, concrete plants, sensors and RFID.

Integrated platform

Independent solutions.
Integrated data.
Comprehensive project control.

Key clients and projects

Experience in infrastructure projects across Latin America

 Client	 Country	 Project or context	 Products
GUPC - Grupo Unidos por el Canal	PA	Ampliación del Canal de Panamá – Tercer Juego de Esclusas	Tracking, Control, production data capture and integration and Claims support
Odebrecht Engenharia & Construção (OEC)	PA	Cinta Costera III, Metro Línea 2, CMC y Ramal, Vía España, Nuevo Colón y II	SisGep, Contract, LAB
Odebrecht Engenharia & Construção	VE	II y III Puente sobre el Río Orinoco, Puente Orinoquia y Consorcio OIV Tocoma	Budget, Cost, Control and Access Control
Odebrecht Engenharia & Construção	VE	Metro Los Teques – Líneas I y II, Proyecto El Diluvio y Puente Nigale	Contract, Budget
Odebrecht Engenharia & Construção	BR	Central Hidroeléctrica Dardanelos	Control and Access Control
Consorcio PROMAN / Odebrecht	BR	Aproveitamento Múltiplo de Manso – Usina Hidrelétrica de Manso	Cost, Control
VINCI Construction Grands Projets	PA	Puente Atlántico – Tercer Puente sobre el Canal de Panamá	Control and Access Control
ALSTOM Panamá, S.A.	PA	Sistema Integral Ferroviario – Línea 2 del Metro de Panamá	Control and Access Control
Salini Impregilo (hoy Webuild)	AR	Sistema Riachuelo – Lote 3 / Emisario Planta Riachuelo	SisGep, Control
Grupo FCC	PA / NI / CR	PTAR, AMPASA, Parque de Maquinaria y proyectos en Nicaragua y Costa Rica	SisGep, PayRoll
Grupo FCC	PA	Corredor de Playas I y II	SisGep, ACM, Daily, Tools, Contract, Cost, Budget y Tracking
Sacyr Construcción	CO	Consorcio MAR1, Consorcio SES, Consorcio SH – Autopista Rumichaca-Pasto y Pamplona-Cúcuta	SisGep, ACM, Daily, Tools e INSP
Obrascón Huarte Lain (OHL)	PA	Consorcio Línea Panamá Norte (CLPN)	PayRoll y Tools
Obrascón Huarte Lain (OHL)	CO / PE	Aeropuerto del Café y Proyecto Quellaveco	SisGep, ACM, Daily y Tools
China Harbour Engineering Company (CHEC)	PA	Cuarto Puente sobre el Canal de Panamá	PayRoll
China Harbour Engineering Company (CHEC)	PA	Terminal de Cruceros de Amador	SisGep, PayRoll
Hyundai Engineering Co.	PA	Consorcio HPH – Línea 3 del Metro de Panamá	SisGep, PayRoll
POSCO Engineering & Construction	PA	Consorcio HPH – Línea 3 del Metro de Panamá	PayRoll
Colas Rail	PA	Línea 3 del Metro de Panamá – Sistemas ferroviarios	PayRoll
Contratistas Línea 3 – Metro de Panamá	PA	Línea 3 del Metro de Panamá y obras asociadas (RL, DMC)	PayRoll
OHLA Progress Enablers	PA	Carretera Panamericana Este (CPE)	PayRoll, SisGep
Saltex Group	PA / US / CO	Expansión del Aeropuerto Internacional de Tocumen	SisGep, Control, Control and Access Control and Integrations
CAO – Constructora Alberto Ortiz	EC	Construcción y desarrollo de proyectos de infraestructura	PayRoll, Contract, Budget, Cost, Control, Stock y Money
Grupo 2 Horizontes	PA	Producción y comercialización de camarón	PayRoll, Control
ASCH Infraestructuras y Servicios	PA	Mantenimiento ferroviario – Línea 1 del Metro de Panamá	PayRoll
Casas Pacifico	PA	Construcción y desarrollo inmobiliario	PayRoll

Clients building the future with data.

Experience in major projects

Presence in several countries

Solutions tailored to each client

Partnerships that deliver results

Available services

Solutions combining construction, technology, and data experience to optimize processes, integrate systems, and generate reliable information for decision-making.

 Consulting	 Configuration	 Development	 Integration	 IoT and Devices	 Migration
 Implementation	 Training	 Support	 Business Intelligence	 Project Controls	 Cloud Infrastructure

Service	Scope
Solution consulting, assessment, and design	Assessment of operational and administrative processes, identification of critical controls, information flows, data models, and management indicators.
Configuration and customization of Adatta solutions	Parameterization and adaptation of Adatta products to processes, business rules, workflows, reports, profiles, and the specific needs of each client or project.
Development of solutions and specific modules	Development of web, desktop, and mobile applications, complementary modules, interfaces, and automations for specific requirements not covered by standard solutions.
Systems and data integration	Integration with ERP, payroll, costs, BI and other platforms through APIs, web services, files, ETL, and databases.
Device, IoT, and automated data capture integration	Integration with facial and biometric readers, access controls, data collectors, machinery sensors, devices, plants, scales, and other field sources for automatic capture, synchronization, monitoring, and traceability of operational information.
Data migration and quality	Extraction, cleansing, standardization, transformation, consolidation, and migration of historical information between systems and projects.
Implementation and go-live	Environment configuration, installation, parameterization, testing, initial data load, user validation, and go-live support and accompaniment.
Training and knowledge transfer	Functional and technical training for users, administrators, and project teams, including specialized courses on SQL Server and databases.
Solution support and evolution	Functional and technical support, incident diagnosis, maintenance, updates, improvements, and continuous evolution of the implemented solutions.
Databases and Business Intelligence	SQL Server consulting: modeling, optimization, performance, security, auditing, backups and continuity; data integration, KPI, dashboards, and management reports.
Project Controls, Claims, and document management	Integration and analysis of cost, production, and progress information; consolidation of evidence, chronologies, traceability, consulting, and large-scale document processing to support claims.
Infrastructure and cloud	Migration, configuration, and administration of servers, databases, applications, and infrastructure in the cloud.

Technology and Data

SQL Server, Oracle, MySQL, MongoDB, SSIS and ETL; integration with ERP and BI; field devices, IoT and cloud services.

Tailored solutions

More efficient processes.
Reliable information.
Results for your projects.

Relevant clients and projects

More than 25 years developing and implementing technology solutions for construction, infrastructure, and operations in Latin America.

Panama

- ✓ Panama Canal Expansion – Third Set of Locks.
- ✓ Lines 2 and 3 of the Panama Metro and extension branches.
- ✓ Fourth Bridge and Atlantic Bridge over the Panama Canal.
- ✓ Cinta Costera III, Corredor de Playas I and II, and East Pan-American Highway.
- ✓ Tocumen International Airport Expansion and Amador Cruise Terminal.
- ✓ Urban Renewal of Colón, Revitalization of Public Spaces, and sanitation projects.
- ✓ Projects developed together with GUPC, OEC, FCC, OHLA, CHEC, VINCI, Hyundai, POSCO, Colas Rail, and other contractors.

Other countries

- ✓ **Colombia:** MAR1, SES, Rumichaca–Pasto, Pamplona–Cúcuta and El Café Airport.
- ✓ **Venezuela:** Tocoma, Metro Los Teques – Lines I and II, II and III Bridge over the Orinoco River, El Diluvio and Nigale Bridge.
- ✓ **Argentina:** Riachuelo System – Lot 3 / Riachuelo Treatment Plant.
- ✓ **Brazil:** UHE Manso and UHE Dardanelos.
- ✓ **Peru, Ecuador, Nicaragua and Costa Rica:** construction, infrastructure and operations projects.

Projects connecting countries

Adriano Alves's professional contribution

- ✓ My career combines **jobsite experience**, **Project Controls**, and **technology**, with knowledge of cost, budgeting, labor, equipment, production, subcontract, and claims processes, together with data architecture, systems integration, and software development.
- ✓ I have participated from requirements gathering and solution design through implementation, integration, training, and support, working alongside project teams to transform operational data into **consistent, traceable information that supports control and decision-making**.
