

To Whom It May Concern

I am writing to recommend Adriano Francisco Alves. He worked with me at GUPC - Grupo Unidos Por El Canal (the main contractor for the construction of the Third Set of Locks of the Panama Canal), as a Software Development Consultant and reported to me in my position as Contract and Claims Department Manager.

As a consultant, Adriano has always been utterly professional, reliable and determined. The software he developed and the databases he created and administered have been instrumental not only in the context of the disputes resolution process of which I was responsible but also for the monitoring and control of the day-to-day construction activities.

During his time in my team, he carried out the following activities.

From 05/2013 to 12/2018, as Senior Database and Software Development Consultant

- ✓ Developed and created databases for report extraction and statistical analysis to support the Cost, Budget, and Claims Departments.
- ✓ Database Administrator.
- ✓ Systems analyst.
- ✓ Implementation and coordination of Daily Reporting System.
- ✓ Systems integrator - multiple platforms.
- ✓ Software for scanning AutoCAD files to batch change layers, layouts, hatch patterns, etc.

From 10/2009 to 12/2011, as Control Room & Data Tracking System Implementation Coordinator

- ✓ Installation process coordination, testing and starting up of the Tracking System & Control Room:
 - CCTV System.
 - Data acquisition and reports: Meteorology, Batching and Crushing plants, Cement Silos, Truck Scales.
 - Network System.
 - SCADA and Incident Management Module Servers and Operator Stations.
 - Turnstiles System.
- ✓ Installation, configuration and training of the "Adatta" software:
 - Manpower productive and idle hours tracking by WBE (mobile collectors).
 - Time Attendance with barcodes or RFID readers (kiosk collectors).
 - Equipment productive and idle hours tracking by WBE (mobile collectors).
 - Equipment Trip Control (mobile collectors).
 - Fuel & Lubricants Supply (mobile collectors).
 - Ingress, Egress and inventory of Goods (mobile collectors).
 - Canteen Module (mobile collectors).
 - Security module (mobile collectors).
 - Clinic Software.
 - Manager Software that allows users to create and print badges, print reports, graphics and perform maintenance of all collected data.
- ✓ Additional Modules developed in site:
 - Batching Monitor – gets production data in real time.
 - Weather Monitor - gets meteorological data in real time.
 - Tracking System connectivity and CCTV Monitor – allows monitoring all the plant and equipment status (Batching, Crushing, Cameras, Antennas, silos, Scales, Servers, Turnstiles, etc.).
 - Integration between badge and turnstiles databases.
 - Integration between badge and payroll databases.
 - Crushing and Batching import Routines.
 - Excel macros and reports developed to accomplish the Tracking System.
 - Management, adjustments and enhancements of Tracking System database.
 - Systems to cross-check and analyse all imported information, enabling changes, batch operations, and import/export routines (Batching, Crushing, Meteorological, Truck Scales, Cement Silos).

Should you have any further questions, feel free to reach me at +507 69305825.

Mario De Paoli
Contract and Claims Department Manager
